CARLYLE CE MARK COMPLIANCE

Product Name 06D, 06E, 06CC & 06T

Product Family

DESCRIPTION

Carlyle is announcing that its 06D, 06E, 06CC & 06T compressors comply with the CE Mark requirements and will have the CE Mark logo added to the appropriate compressor nameplates. With the implementation of the CE Mark, a ground lug has been added to the terminal plate. For the location of the lug with the various compressor configurations – see the figures below. The CE Mark and ground lug will become effective in February of 2003 on all the compressors.

06D with Drawn Steel Box

06D with Folded Box

06E, 06CC & 06T – with 6-Terminals
(For 06T – motor thermistor not shown)

06E, 06CC – with 9-Terminals

The terminal box grounding lug (Carlyle P/N HY90HR001) is a compression fitting with the capability of connecting a wire size in the #14 to #6 range. If the grounding lug is loosened to re-orientate the direction, it should be tightened to a torque of 18 to 28 in-lbs.

Effective May 29, 2002, all pressure equipment marketed and installed into service within the European Union must comply with the requirements imposed by the European Pressure Directive (PED) 97/23/EC. There are certain exclusions from compliance with this directive. The mechanical design of Carlyle semi-hermetic compressors provides for exclusion from the scope of the PED based on criteria indicated in Article 1, Paragraph 3.10 of the directive. This covers our 06D, 06E & 06T compressor models.
